

# We offer streaming video so you can stay connected

## What is ChildView?

ChildView offers all parents the opportunity to view their child/children while at their child care center. We provide a secure, high quality online viewing experience. Developed by parents for parents, ChildView allows today's active parents the opportunity to view their child from any computer or smart device with Internet access. Make sure you have completed the username/password form with your center. Once your information is activated by your center, you will have secure access to view your loved one. Your center has partnered with us in order to provide you **PEACE OF MIND**.

## How does ChildView work?

Once the necessary equipment has been installed at your childcare center, you log onto your website from any computer (home, work, or while traveling) using your secure username/password. Using state of the art technology, ChildView will provide you a secure, reliable method to keep an eye on your child. All you need is a smart device or computer with internet access and of course a username & password. The video should move quickly, however the speed of your center's internet and your internet will affect the streaming quality. **High speed internet is always recommended.**

## What if I need help?

It's as easy as A-B-C. Depending on the speed of your internet connection, the video should display within a couple of minutes. We strongly recommend a high speed internet connection to improve the quality of the streaming video. If you have questions simply call ChildView's toll free number, **1-866-343-3656**, and one of our trained staff will be glad to help you.

## How secure is ChildView?

Our system is set up with the **highest level of security**, 256 bit encryption. Only authorized users will have access to the system. Security is a top priority at ChildView. We have trained professionals that monitor your site daily. If you are having issues logging on please call our toll free number for assistance.
